**\* Note:** For each crop listed the review period is from today's date (1/20/2014) to the end of the target month. The Target Probability % is the percent of the time that the Futures hit the Futures Target Price at least one day during the review period. The Move Probability is the percent of the time that the futures move the amount needed to reach the Futures Target Price level during the review period. The Last Years review is based on your selected years, but the similar year figures (if any) are based on MDI's selected years with similar world and US characteristics.

Similar Years

The Years considered **Similar** are: 2005, 2006, 2010, 2011
